Construction and Demolition Materials (wood, metal, drywall, carpet, cardboard, etc.)	Est. Qty. (tons)	Franchised Hauler/Self-Haul
Total		
Inert Materials (concrete, sand, dirt, rock, gravel, clean fill, trees, stumps, etc.)*	Est. Qty. (tons)	Franchised Hauler/Self-Haul/Reuse
Total		

*Pursuant to 2022 California Green Building Standards Code, 100 percent of trees, stumps, rocks, and associated vegetation and soils resulting primarily from land clearing shall be reused or recycled. For a phased project, such material may be stockpiled on site until the storage site is developed. * If contamination by disease or pest infestation is suspected, contact the County Agricultural Commissioner and follow its direction for recycling or disposal of the material.

Self-Haul

Contractors may self-haul their waste and recyclable materials if they possess a valid California contractor's license for their scope of work. For example, in order for a demolition contractor to self-haul, the demolition contractor shall be licensed with the California State Licensing Board to conduct demolition services. Waste hauling services may **not** be subcontracted.

General contractors who subcontract service shall ensure all subcontractors are either using a City franchised hauler or are eligible to self-haul. If you choose to self-haul, a separate self-haul verification form will be requested upon project finalization and submitted alongside all applicable weight tickets, scale reports and/or diversion reports. The self-haul verification form can be found at city.sc/cdmmp.

The City of Santa Clarita's Construction & Demolition Recycling Ordinance (05-09) requires all demolition projects, all commercial construction projects of new construction or additions over 1,000 square feet and all tenant improvements, alterations or new construction valued over \$200,000, all new residential construction projects, and all residential additions and improvements that increase building area, volume, or size to recycle a minimum of 65 percent (65%) of all materials. There is a deposit required which is calculated at two percent (2%) of the highest valuation or \$15,000 (whichever is less) for construction projects, and ten percent (10%) or \$15,000 (whichever is less) for demolition projects.

It is the responsibility of the applicant to ensure the recycling requirements are met by working closely with the approved waste hauler(s). Please make sure you keep records from your waste hauler(s) or weight tickets from the C&D recycling center/landfill. These records will be necessary to prove your recycling tonnages and will be required to have your deposit returned at the end of the project. Please note deposits take up to three weeks to be refunded.
